Dear Ms. Drumm, There is no reason that Black Point and Green Point should be lumped together. The issues of both areas are completely different. The small size of the BP homes and land area of each lot should be a clue that they are not the same communities. Yes Black Point is much more organized than Green Point, mainly because the County addresses everything to Black Point and the folks living in Green Point don't realize that the County is also trying to lump Green Point into Black Point. The cost of a home in Black Point is about \$500,000. lower than Green Point. The taxes that come out of Green Point, because they are newer and bigger than the homes in Black Point are at least twice that of the Black Point homes. Don't try to lump Green Point with Black Point, because Green Point is waking up and we won't stand for it. Don't let it come back to bite you, do the right thing and address them as two different areas. If I were not in AZ till April, I would be at every one of your meeting, I hope my neighbors will follow up on these issues.
