**SUBJECT: In connection with National Public Health Week (April 1-7) and the designation of April 5 as Climate Change Day, request from Supervisor Sears to receive an update from the Department of Health and Human Services on the health impacts of climate change.**

Dear Supervisors:

**RECOMMENDATION:**

1. Receive brief update from Department of Health and Human Services on projected Health Impacts of Climate Change

**SUMMARY:** The first week in April is National Public Health Week and this year's theme is "Creating the Healthiest Nation: For Science. For Action. For Health." Each day of the week focuses on a key public health topic critical to the future success in creating the healthiest nation. April 5<sup>th</sup> was designated as Climate Change Day to focus on and bring awareness to the health threats from climate change. In recognition of Climate Change Day, the Department would like to highlight what we are looking towards as a community and a nation regarding the projected health impacts of climate change.

**FISCAL IMPACT:** There is no fiscal component associated with the acceptance of this report.
